

FIBERGLASS

**The Ideal Solution for
Marinas and Docks!**

*DURAGRID T-1700 pultruded
grating walkway at the City of
Miami's Dinner Key Marina.*

DURAGRID®
Pultruded Grating

DURAGRID® custom pultruded fiberglass grating is available in a wide variety of bar shapes and spacings to meet your specific needs. As an added safety feature, standard DURAGRID® grating has a durable non-skid surface.

STRONGRAIL™ and custom architectural fiberglass handrail systems are strong, attractive and withstand even corrosive salt-water environments with ease. The systems are a strong, attractive, low-maintenance and long-lasting alternative to steel, aluminum and wood. Systems can add safety and beauty to your property.

STRONGRAIL™
Architectural Handrail

EXTREN®
Structural Shapes

EXTREN® structural shapes and plate are the ideal replacement for wood and metal structural materials in both marine and freshwater environments. Strongwell offers more than 100 standard shapes to meet all of your structural fabrication needs.

Why Use Fiberglass:

- **Rot/Rust Mildew Resistant**
- **Structurally Strong**
- **Lightweight**
- **Easy to Install and Maintain**
- **Aesthetically Pleasing**
- **Low Electrical & Thermal Conductivity**

Fiberglass pultruded grating, handrail and structural shapes and plate from Strongwell offer an attractive, low-maintenance and long-lasting alternative to steel and wood in corrosive marine and freshwater environments. To find out how fiberglass can be a cost-effective solution to your maintenance problems, call Jeff Finley today at (507) 867-3479!
