

DURADEK®/DURAGRID® PULTRUDED GRATING

Fiberglass grating panels are a strong, lightweight, low-maintenance replacement for metallic grates. Available in a wide variety of thicknesses, panel sizes, colors, grits, and resin systems. DURAGRID® was installed as a walkway at Freemont High School's pool in Ohio (above). Life cycle costs were extremely attractive compared to metal grating since fiberglass won't rust, rot, or corrode in a pool environment.

STRONGDEK™ ARCHITECTURAL DECKING SYSTEMS

Attractive, low-maintenance decking system that offers an alternative to traditional materials. STRONGDEK™ is lighter and stiffer than wood and competitive composite decking. STRONGDEK™ was installed adjacent to the pool at the Perdido Beach Resort in Orange Beach, AL. The deck has weathered several harsh coastal storms and still remains attractive and strong.

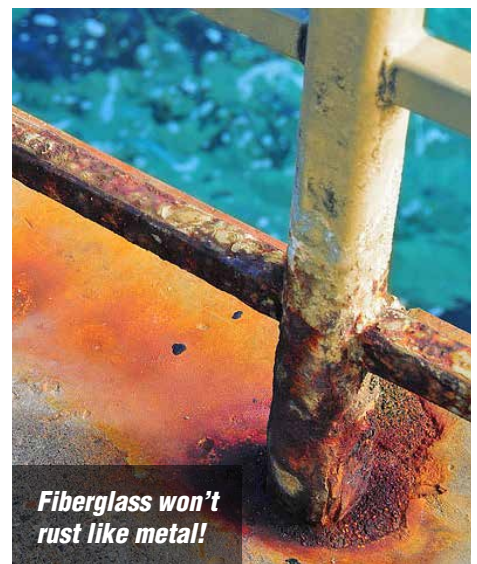

STRONGRAIL® ARCHITECTURAL HANDRAIL AND FENCING

STRONGRAIL® and custom handrail and fencing systems are strong, attractive, and withstand even corrosive salt-water environments with ease. An 8' tall, custom fiberglass fence replaced wrought iron at this Kingwood, TX, community pool. It provides aesthetic appeal like the wrought iron, but without the corrosion problems faced at a pool side environment.

EXTREN® STRUCTURAL SHAPES & PLATE

The ideal replacement for wood and metal structural materials in both marine and freshwater environments. Strongwell offers more than 100 standard shapes to meet all needs. EXTREN® structural shapes were used to fabricate the multistory waterslide stair structure at the municipal pool in Chatfield, MN (left). Fiberglass was chosen due to the city wanting a durable, nonconductive, and low-maintenance material.

Fiberglass won't rust like metal!

BENEFITS OF STRONGWELL FRP

- Won't Rust, Rot, or Corrode
- Lightweight
- Low Electrical & Thermal Conductivity
- Easy to Install
- High Strength-to-Weight Ratio
- Virtually Maintenance Free
- EMI & RFI Transparency
- Slip & Impact Resistant
- Finish/Color Option Variety

STAIR TREADS AND COVERS

Strongwell offers a variety of stair treads and stair tread covers to meet the specific requirements of your application. Treads can be molded or pultruded in multiple colors and configurations.

DURASHIELD® INSULATED FIBERGLASS BUILDING PANELS

DURASHIELD® is a tongue-and-groove fiberglass pultruded panel comprised of a pultruded skin over a foam core. DURASHIELD® panels have R-values equal to 5 (1" panel) and 17 (3" panel). This storage shed, located at a community pool, houses unsightly garbage receptacles as well as pool equipment. Also, DURASHIELD® absorbs the noise of the pool's pump, ensuring a pleasant visit by guests.
